

Debriefing Assessment for Simulation in Healthcare (DASH) Instructor Version[©]

Directions: Please provide a self-assessment of your performance for the introduction and debriefing in this simulation-based exercise. Use the following rating scale to rate the "Behaviors" and "Elements." Do your best to rate your **overall effectiveness for the whole Element** guided by the Behaviors that define it. If a listed Behavior is not applicable (e.g. how you handled upset people if no one got upset), just ignore it and don't let that influence your evaluation. You may have done some things well and some things not so well within each Element. The Element rating is your **overall** impression of how well you executed that particular Element.

Element 1 assesses the introduction at the beginning of the simulation-based exercise. Elements 2 through 6 assess the debriefing.
